

### REMARKS

The present amendment is submitted to correct formal matters in various claims without changing the scope of the invention. Additionally, the specification is amended to include a previously submitted priority claim. No claims are deleted or added by this paper. Accordingly, Claims 56-122 are pending.

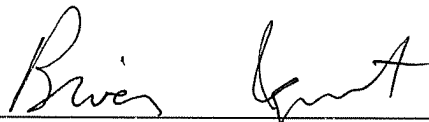

The priority claim added to the specification by the present amendment was first presented in the application transmittal filed along with the application on June 20, 2001. The priority claim was timely and was reflected on the filing receipt. This present amendment is submitted to include this same priority claim in the text of the application. No new priority claim and no new matters are presented at this time.

Claims 56, 58, 60, 64, 65, 67, 69, 70, 72, 74, 76, 77, 79, 81, 83, 85, 87, 88, 107, 111, 113, 115, 116, 118 and 119 have been amended to correct claim language, such as grammar and antecedent basis issues. Accordingly, it is requested that the Examiner reconsider the claims. The above claim amendments do not include new matter. Moreover, it is believed that no subject matter of any claim has changed in a way that affects patentability.

Favorable consideration of the amendments set forth above is respectfully requested. If there are any claims that the Examiner believes are not now allowable, it is requested that the Examiner phone the undersigned representative regarding such claims.

Respectfully submitted,

SHERIDAN ROSS P.C.
